Correction

In ""T-l-iodobenzamide-SPECT predicts dopaminergic responsiveness in patients with de novo parkinsonism" by Schwarz et al, which appeared in the March issue (Neurology 1992;42:556-561), an error occurred in the identification and placement of figures 1A and 1B. The figures are correctly identified and oriented below. The editors apologize for the error.

Figure 1. Transverse section of IBZM-SPECT obtained in a patient with parkinsonism and normal IBZM binding and a positive response to apomorphine (A), and decreased IBZM binding and a negative response to apomorphine (B). The images were generated by adding the two consecutive sections with the highest specific IBZM binding.
123 1-iodobenzamide-SPECT predicts dopaminergic responsiveness in patients with de novo parkinsonism
