Views & Reviews

859 Commentary on the practice parameters for the persistent vegetative state S. Ashwal, R.E. Cranford, and J.H. Rosenberg

Articles

861 Early anticoagulation after large cerebral embolic infarction: A safety study A. Chamorro, N. Vila, A. Sait, M. Alday, and E. Tolosa

865 Common drugs may influence motor recovery after stroke L.B. Goldstein and the Sygen in Acute Stroke Study Investigators

871 Sudden death from aneurysmal subarachnoid hemorrhage W.I. Schievink, E.F.M. Wijdicks, J.E. Parisi, D.G. Piepgras, and J.P. Whisnant

875 Cognitive outcome after aneurysm rupture: Relationship to aneurysm site and perioperative complications P. Tidsswll, P.S. Dias, H.J. Sagar, A.R. Mayes, and R.D.E. Battertsy

889 Ictal scalp EEG in temporal lobe epilepsy with unitemporal versus bitemporal interictal epileptiform discharges B.J. Steinhoff, N.K. So, S. Lim, and H.O. Lüders

897 Motor persistence of orbicularis oculi muscle in eyelid-opening disorders M. Aramideh, B.W. Ongerboer de Visser, J.H.T.M. Koelman, and J.D. Speelman

915 EEG reactivity in the prognosis of severe head injury E. Güting, A. Gonser, H.-G. Imhof, and T. Landis

924 Clinical evidence of genomic imprinting in Tourette's syndrome D.G. Lichter, L.A. Jackson, and M. Schachter

929 Age influences chemotherapy response in astrocytomas R. Grant, B.C. Liang, M.A. Page, D.L. Crane, H.S. Greenberg, and L. Junck

942 The genetics of idiopathic generalized epilepsies of adolescent onset: Differences between juvenile myoclonic epilepsy and epilepsy with random grand mal and with awakening grand mal D.A. Greenberg, M. Durner, S. Rosor, D. Rosenbaum, and S. Shinnar

951 Distinct cognitive profiles of cortical and subcortical dementia in advanced illness J.S. Paulsen, N. Butters, J.R. Sadek, S.A. Johnson, D.P. Salmon, N.R. Swerdlow, and M.R. Swenson

957 Neuropsychological detection and characterization of preclinical Alzheimer's disease D.M. Jacobs, M. Sano, G. Deoneief, K. Marder, K.L. Bell, and Y. Stern

962 The P1 component of the middle latency auditory evoked potential predicts a practice effect during clinical trials in Alzheimer's disease J.B. Green, W.W. Elder, and D.M. Freed

966 Apnea testing by artificial CO2 augmentation C.J.G. Lang

Brief Communications

982 A leucine-to-phenylalanine substitution in the acetylcholine receptor ion channel in a family with the slow-channel syndrome C.M. Gomez and J.T. Gammack

985 Automatic stepping in the pontomedullary stage of central herniation J.P. Hanna and J.I. Frank

989 The frontal N30 component of the median-derived SEP in patients with predominantly unilateral Parkinson's disease P.A. Garcia, M.J. Aminoff, D.S. Goodin

993 Inclusion body myositis presenting with isolated erector spinae paresis E. Hund, R. Heeki, H.H. Goebel, and H.-M. Meinck

995 Persistence of MRI hyperintensity of the globus pallidus in cirrhotic patients: A 2-year follow-up study J. Kulisevskys, J. Pujol, J. Deus, C. Junqué, J. Balanzó, A. Avila, and A. Capdevila
