Editorial

797 The insistent call from functional MRI
J.W. Prichard and J.L. Cummings

801 The increasingly complex genetics of Tourette's syndrome
D. Sadounick and R. Kurlan

Views & Reviews

803 Seizures, epilepsy, and functional recovery after traumatic brain injury: A reappraisal
T.D. Hernandez and D.K. Naritoku

Contemporary Issues

807 Neurology workforce and the Residency Review Committee
M.A. Fishman

Articles

810 Effects of anti-CD4 antibody treatment on lymphocyte subsets and stimulated tumor necrosis factor alpha production: A study of 29 multiple sclerosis patients entered into a clinical trial of cM-T412

817 Quantitative assessment of sustained-release 4-aminopyridine for symptomatic treatment of multiple sclerosis

821 MRI of optic nerve enlargement in optic neuritis
W.T. Cornblath and D.J. Quint

826 T-cell tumor necrosis factor-α receptor binding in patients with multiple sclerosis
P. Bongioanni and G. Meucci

832 Clinical safety of serial monthly administrations of gadopentetate dimeglumine in patients with multiple sclerosis: Implications for natural history and early-phase treatment trials

836 Metabolite abnormalities in progressive multifocal leukoencephalopathy by proton magnetic resonance spectroscopy
L. Chang, T. Ernst, C. Tornatore, H. Aronow, R. Melchor, I. Walot, E. Singer, and M. Cornford
