### THIS WEEK IN Neurology®

163  Highlights of the January 15 issue

### EDITORIALS

164  MS and cognition and APOE: The ongoing conundrum about biomarkers  
A. Dessa Sadovnick and Daniel H. Jacobs

166  Epilepsy-associated bone mineral density loss should be prevented  
Edwin Trevathan

### IN MEMORIAM

168  John M. Newsom-Davis, MD (1932–2007)  
Thomas R. Swift

### ARTICLES

170  Progressive bone deficit in epilepsy  
R.D. Sheth, N. Binkley, and B.P. Hermann  
[Editorial, p. 166]

177  Basal ganglia involvement in temporal lobe epilepsy: A functional and morphologic study  
V. Bouilleret, F. Semah, F. Chassoux, M. Mantzaridez, A. Biraben, R. Trebossen, and M.-J. Ribeiro

185  APOE e4 allele is associated with cognitive impairment in patients with multiple sclerosis  
[Editorial, p. 164]

191  Volumetric MRI vs clinical predictors of Alzheimer disease in mild cognitive impairment  
For the Alzheimer’s Disease Cooperative Study

200  Increased risk of parkinsonism in women who underwent oophorectomy before menopause  

---

### CLINICAL IMPLICATIONS OF NEUROSCIENCE RESEARCH

210  Cortical areas involved in Arabic number reading  
F.-E. Roux, V. Lubrano, V. Lauwers-Cances, C. Giussani and J.-F. Démonet

218  The “sunglasses sign” predicts nonorganic visual loss in neuro-ophthalmologic practice  

222  Elevated plasma homocysteine levels in patients with amyotrophic lateral sclerosis  

226  The hypocretin neurotransmission system in myotonic dystrophy type 1  

### CLINICAL/SCIENTIFIC NOTES

231  Adenosine and its receptors: Multiple modulatory functions and potential therapeutic targets for neurologic disease  
Eduardo E. Benarroch

237  Isolated facial and bulbar paresis: A persistent manifestation of neonatal myasthenia gravis  
P.-Y. Jeannot, J.-P. Marcoz, T. Kuntzer, and E. Roulet-Perez

238  Clinicopathologic study of a SNCA gene duplication patient with Parkinson disease and dementia  

### RESIDENT & FELLOW SECTION

e9  Pearls & Oy-sters: False positives in short-segment nerve conduction studies due to ulnar nerve dislocation  
B.J. Kim, S.B. Koh, K.W. Park, S.J. Kim, J.S. Yoon

Position statement on laws and regulations concerning life-sustaining treatment, including artificial nutrition and hydration, for patients lacking decision-making capacity

To the Editor: S.V. Kothare, A.M. Altman, and I.N. Rodriguez. Reply from the Authors: M.A. Williams, J. Gordon, and D. Bacon

Neurovascular unit dysfunction: A vascular component of Alzheimer disease?

To the Editor: Steven R. Brenner

Inherited erythermalgia moves a sodium channel into focus

Cornelia de Vries Syndrome and Tuberous Sclerosis Complex: Are they really distinct entities?

To the Editor: Claudia M. Ogasawara, Kashiwa Ono, and Yoshiaki Hori

Neurology® Podcast

Progressive bone deficit in epilepsy

The weekly podcast of content from Neurology is located on the AAN Web site at www.aan.com. Select the “podcast” button in the Neurology section under Publications Highlights to subscribe to the podcasts or listen to an individual podcast.

This week’s podcast features an interview by Dr. S. Matthew Stead and Dr. Juliana Lockman with Dr. Raj Sheth about his paper on bone deficit in epilepsy.

Neurology® Online CME Program

Earn CME while reading Neurology. This program is available only to online Neurology subscribers. Simply read the articles marked CME, go to www.neurology.org, and click on CME. This will provide all of the information necessary to get started. The American Academy of Neurology (AAN) is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to sponsor continuing medical education for physicians. Neurology is planned and produced in accordance with the ACCME Essentials. For more information, contact AAN Member Services at 800-879-1960.
