<tbody>
<tr>
<td>1453</td>
<td>Highlights of the April 28 issue</td>
<td></td>
</tr>
<tr>
<td>1454</td>
<td>Steroids for PML-IRIS: A double-edged sword?</td>
<td>Joseph R. Berger</td>
</tr>
<tr>
<td>1456</td>
<td>Botulinum toxin for neuropathic pain?</td>
<td>Stuart C. Apfel</td>
</tr>
<tr>
<td>1458</td>
<td>PML-IRIS in patients with HIV infection: Clinical manifestations and treatment with steroids</td>
<td>K. Tan, R. Roda, L. Ostrow, J. McArthur, and A. Nath</td>
</tr>
<tr>
<td>1465</td>
<td>Changes in MRS neuronal markers and T cell phenotypes observed during early HIV infection</td>
<td>M.R. Lentz, W.K. Kim, V. Lee, S. Bazner, E.F. Halpem, N. Venna, K. Williams, E.S. Rosenberg, and R.G. González</td>
</tr>
<tr>
<td>1479</td>
<td>Quantification of sweat gland innervation: A clinical-pathologic correlation</td>
<td>C.H. Gibbons, B.M.W. Illigens, N. Wang, and R. Freeman</td>
</tr>
<tr>
<td>1495</td>
<td>Neuropathologic intermediate phenotypes enhance association to Alzheimer susceptibility alleles</td>
<td>D.A. Bennett, P.L. De Jager, S.E. Leurgans, and J.A. Schneider</td>
</tr>
<tr>
<td>1504</td>
<td>In vivo mapping of amyloid toxicity in Alzheimer disease</td>
<td>G.B. Frisoni, M. Lorenzi, A. Caroli, N. Kemppainen, K. Nägner, and J.O. Rinne</td>
</tr>
</tbody>

<th>Authors</th>
</tr>
</thead>
<tbody>
<tr>
<td>e80</td>
<td>Teaching Neurolimages: Focal ischemia of the spinal micturition center and detrusor-external sphincter dyssynergia</td>
<td>Yince Loh and Gary Duckwiler</td>
</tr>
<tr>
<td>e81</td>
<td>Teaching Neurolimages: “Penguin” or “hummingbird” sign and midbrain atrophy in progressive supranuclear palsy</td>
<td>Jerome J. Graber and Robert Staudinger</td>
</tr>
</tbody>
</table>
PATIENT PAGE

Using botulinum toxin to treat diabetic foot pain
Jacob L. Kaufman and Steven Karczke

CORRESPONDENCE

Phenomenology of prolonged febrile seizures: Results of the FEBSTAT study
To the Editor: Rod C. Scott and Brian G. Neville. Reply from the Author: Shlomo Shinnar. To the Editor: E.A. Herrera, S.Y. Alvarez, O. Cobox, and T. Villeda. Reply from the Authors: Shlomo Shinnar

CORRECTION

Clinical features of hereditary spastic paraplegia due to spastin mutation

Neurology® Podcast

Risk of dementia in MCI: Combined effect of cerebrovascular disease, volumetric MRI, and 1H MRS

The weekly podcast of content from Neurology is located on the AAN Web site at www.aan.com. Select the “podcast” button in the Neurology section under Publications Highlights to subscribe to the podcasts or listen to an individual podcast.

This week’s podcast features an interview by Dr. Jeffrey M. Burns with Dr. Kejal Kantarci about her paper on the risk of dementia in MCI.

Neurology® Online CME Program

Earn CME while reading Neurology. This program is available only to online Neurology subscribers. Simply read the articles marked CME, go to www.neurology.org, and click on CME. This will provide all of the information necessary to get started. The American Academy of Neurology (AAN) is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to sponsor continuing medical education for physicians. Neurology is planned and produced in accordance with the ACCME Essentials. For more information, contact AAN Member Services at 800-879-1960.
