IN FOCUS
1025 Spotlight on the September 13 Issue

EDITORIALS
1026 Progression rates of dominant spinocerebellar ataxias
Sid Gilman

1028 MRI measures predict progressive supranuclear palsy: Clinically useful?
Morvarid Karimi and Joel S. Perlmutter

1030 The strong presence of REM sleep behavior disorder in PD: Clinical and research implications
Carlos H. Schenck and Bradley F. Boeve

1033 Too much of a good thing? IRIS with natalizumab-associated PML
Joseph R. Berger

ARTICLES
1035 The natural history of spinocerebellar ataxia type 1, 2, 3, and 6: A 2-year follow-up study

1042 MRI measurements predict PSP in unclassifiable parkinsonisms: A cohort study

1048 Associated factors for REM sleep behavior disorder in Parkinson disease
F. Sixel-Do¨ring, E. Trautmann, B. Mollenhauer, and C. Trenkwalder

1050 Massive expansion of SCA2 with autonomic dysfunction, retinitis pigmentosa, and infantile spasms
A.R. Paciorkowski, Y. Shafrir, J. Hrivnak, M.C. Patterson, M.B. Tennison, H.B. Clark, and C.M. Gomez

1055 Imaging evolution of acute lacunar infarction: Leukoariosis or lacune?
S. Koch, M.S. McClendon, and R. Bhatia

1061 Immune reconstitution inflammatory syndrome in natalizumab-associated PML

1068 Association of Alzheimer disease pathology with abnormal lipid metabolism: The Hisayama Study

1076 Anatomy and physiology predict response to motor cortex stimulation after stroke
Sarvenaz Nouri and Steven C. Cramer

1084 Cognition after carotid endarterectomy or stenting: A randomized comparison

1091 Imaging evolution of acute lacunar infarction: Leukoariosis or lacune?
S. Koch, M.S. McClendon, and R. Bhatia

1096 Bilateral somatosensory cortex disinhibition in complex regional pain syndrome type I

CLINICAL/SCIENTIFIC NOTES
1102 Novel p.Ile151Val mutation in VCP in a patient of African American descent with sporadic ALS

HISTORICAL ABSTRACTS
1083 Alzheimer’s disease in Down’s syndrome: Clinicopathologic studies

1090 Deletions of mitochondrial DNA in Kearns-Sayre syndrome
