**IN FOCUS**

809  
Spotlight on the August 30 Issue

**EDITORIALS**

810  
White matter in traumatic brain injury: Dis- or dysconnection?  
Pieter E. Vos and Erin D. Bigler

812  
Does detection of anti-AQP4 antibodies trump clinical criteria for neuromyelitis optica?  
Brian G. Weinshenker and William M. Carroll

814  
Do neurologists make a difference in Parkinson disease care?  
James F. Burke and Roger L. Albin

816  
Further restrictions on resident duty hours: Let’s look before we leap  
Douglas J. Gelb

**ARTICLES**

818  
Longitudinal changes of structural connectivity in traumatic axonal injury  
J.Y. Wang, K. Bakhadirov, H. Abdi, M.D. Devous, Sr., C.D. Marquez de la Plata, C. Moore, C.J. Madden, and R. Diaz-Arrastia  
Editorial, p. 810

827  
AQP4 antibody–positive Thai cases: Clinical features and diagnostic problems  
S. Siritho, I. Nakashima, T. Takahashi, K. Fujihara, and N. Prayoonwiwat  
Editorial, p. 812

835  
Interferon-$\beta$-1b–neutralizing antibodies 5 years after clinically isolated syndrome  
Editorial, p. 816

844  
Progressive multiple sclerosis is not associated with chronic cerebrospinal venous insufficiency  
C. Baracchini, P. Perini, F. Causin, M. Calabrese, F. Rinaldi, and P. Gallo

851  
Neurologist care in Parkinson disease: A utilization, outcomes, and survival study  
A.W. Willis, M. Schootman, B.A. Evanoff, J.S. Perlmutter, and B.A. Racette  
Editorial, p. 814

858  
Network correlates of the cognitive response to levodopa in Parkinson disease  
P.J. Mattis, C.C. Tang, Y. Ma, V. Dhawan, and D. Eidelberg

866  
Altered functional connectivity in asymptomatic MAPT subjects: A comparison to bvFTD  

875  
Inclusion of RBD improves the diagnostic classification of dementia with Lewy bodies  

883  
Pilot trial of IOM duty hour recommendations in neurology residency programs: Unintended consequences  

888  
IV thrombolysis and statins  

896  
Retinal microvascular changes and subsequent vascular events after ischemic stroke  

904  
Converging PET and fMRI evidence for a common area involved in human focal epilepsies  

**CLINICAL/SCIENTIFIC NOTES**

911  
Superior canal dehiscence causes abnormal vestibular bone-conducted tuning  
A.S. Zhong, S. Govender, and J.G. Colebatch

CONTINUED
Rapid emergence of temporal and pulvinar lesions in MELAS mimicking Creutzfeldt-Jakob disease
D. Weiss, K. Brockmann, T. Nägele, T. Gasser, and R. Krüger

The treatment of migraine with propranolol
Ronald B. Weber and Oscar M. Reinmuth

Parkinsonism: Onset, progression, and mortality
M.M. Hoehn and M.D. Yahr

Neurology Journal Club: A new subsection
John J. Millichap and Joshua L. Goldstein
See p. 918

Journal Club: Estimating risk for developing epilepsy: A population-based study in Rochester, Minnesota
Victoria S.S. Wong and Lisa M. Bateman
See p. 915

Teaching NeuroImages: Benediction sign as a result of cervical astrocytoma with syringomyelia
R. Velizarova, A. Crespel, R. Juntas-Morales, P. Coubes, and P. Gélisse
See p. 915

Teaching NeuroImages: Myelopathy due to B12 deficiency in long-term colchicine treatment and nitrous oxide misuse

Do neurologists make a difference in Parkinson disease care?
James F. Burke and Roger L. Albin

Acute and preventive pharmacologic treatment of cluster headache
To the Editors: B.L. Peterlin, R.A. Purdy, and A.M. Rapoport; A.R. Gantenbein, M. Strüvenegger, F. Riederer, P.S. Sandor, and C. Gaul. Reply from the Authors: Tamara Pringsheim and Werner Becker

Fulminant encephalopathy with basal ganglia hyperintensities in HIV-infected drug users
To the Editor: Pasquale F. Finelli. Reply from the Authors: Scott Newsome and Avindra Nath

Identification of pure subcortical vascular dementia using 11C-Pittsburgh compound B

Book Review

Commenting Online is Easier Now with WriteClick
Have a comment on a recent Neurology® article you would like to share? Now it is easier and more convenient. Neurology.org has launched WriteClick on the home page and sidebars of each article to encourage remarks and debate among users.

WriteClick is restricted to comments about studies published in Neurology within the last eight weeks.

Scan this code with your smartphone to join the debate now!
