Spotlight on the November 13 Issue

This Week’s Neurology® Podcast

**EDITORIALS**

*Blood pressure variability in subacute ischemic stroke: A neglected potential therapeutic target*

G. Tsivgoulis and G. Ntaios

*Focal cortical thinning is caused by remote subcortical infarcts: Spooky action at a distance*

E.E. Smith and A. Arboix

**ARTICLES**

*Effect of blood pressure on 3-month functional outcome in the subacute stage of ischemic stroke*

*Incident subcortical infarcts induce focal thinning in connected cortical regions*

M. Duering, R. Righart, E. Csanadi, E. Jouvent, D. Hervé, H. Chabriat, and M. Dichgans

*Cerebral small-vessel disease and progression of brain atrophy: The SMART-MR study*

*Adherence to antihypertensive agents after ischemic stroke and risk of cardiovascular outcomes*

S. Perreault, A.Y.X. Yu, R. Côté, A. Dragomir, B. White-Guay, and S. Dumas

*Migraine headache is present in the aura phase: A prospective study*

*Video game-based coordinative training improves ataxia in children with degenerative ataxia*

W. Ilg, C. Schatton, J. Schicks, M.A. Giese, L. Schöls, and M. Synofzik

*Traumatic brain injury, paraquat exposure, and their relationship to Parkinson disease*

P.-C. Lee, Y. Bordelon, J. Bronstein, and B. Ritz

**VIEWS & REVIEWS**

*Parkinson disease and driving: An evidence-based review*

A.M. Crizzle, S. Classen, and E.Y. Uc

**CLINICAL/SCIENTIFIC NOTES**

*PML-IRIS in a patient treated with brentuximab*

G. von Geldern, C.A. Pardo, P.A. Calabresi, and S.D. Newsome

*A 66-year-old patient with vanishing white matter disease due to the p.Ala87Val EIF2B3 mutation*

**REFLECTIONS: NEUROLOGY AND THE HUMANITIES**

*A Neurologist, an EMR, and a Patient*

V.F.M.L. Ramos

**NEUROIMAGES**

*Contrast-enhanced ultrasound and detection of carotid plaque neovascularization*

H. Kunte, C. Schmidt, L. Harms, R.-I. Rückert, M. Grigoryev, and T. Fischer
RESIDENT & FELLOW SECTION

e178 Emerging Subspecialties in Neurology: Neuroimmunology
S.L. Clardy

e181 Teaching Neuromages: A case of tubercular arteritis and stroke after early discontinuation of antibiotic therapy
L.D. Parish and A. Pirisi

DEPARTMENT

C3 In the Next Issue of Neurology®

Neurology® Online CME Program

Earn CME while reading Neurology. This program is available only to online Neurology subscribers. Simply read the articles marked CME, go to www.neurology.org, and click on CME. This will provide all of the information necessary to get started. The American Academy of Neurology (AAN) is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to sponsor continuing medical education for physicians. Neurology® is planned and produced in accordance with the ACCME Essentials. For more information, contact AAN Member Services at 800-879-1960.

Editor’s Note to Authors and Readers: Levels of Evidence in Neurology®

Effective January 15, 2009, authors submitting Articles or Clinical/Scientific Notes to Neurology® that report on clinical therapeutic studies must state the study type, the primary research question(s), and the classification of level of evidence assigned to each question based on the AAN classification scheme requirements. While the authors will initially assign a level of evidence, the final level will be adjudicated by an independent team prior to publication. Ultimately, these levels can be translated into classes of recommendations for clinical care. For more information, please access the articles and the editorial on the use of classification of levels of evidence published in Neurology.1-3
