A 21-year-old-man presented in a semiconscious state with 2 days’ inability to walk and 5 days’ history of fever (102.2°F) and rash. Examination revealed severe ataxia, slurred speech, and a scrotal scar (figure 1). Head CT and CSF studies were normal. Brain MRI revealed diffuse cerebellar cortical hyperintensity on T2 and fluid-attenuated inversion recovery images (figure 2, A and B), with restriction (figure 2C) and postcontrast enhancement (figure 2D) suggesting inflammation. Weil-Felix test (OX-K-1:320) and immunoglobulin M ELISA were positive for scrub typhus. Improvement occurred after oral doxycycline.

Isolated cerebellar involvement is rare in scrub typhus, a mite-born infection caused by Orentia tsutsugamushi that classically presents with fever, rash, and eschar. Laboratory confirmation is required to differentiate it from co–endemic diseases like typhoid, leptospirosis, and dengue.

Rohit Bhoil, MD, Suresh Kumar, DM, R.G. Sood, MD, Sabina Bhoil, MD, Richa Verma, MBBS, Roshan Thakur, MBBS
From IGMC, Shimla (HP), India.

Author contributions: R. Bhoil: study concept and design, acquisition of data, analysis and interpretation of data. S. Kumar: data interpretation, study supervision. R.G. Sood: study supervision. S. Bhoil: study concept and design, critical revision of manuscript. R. Verma: data accumulation, study concept. R. Thakur: data accumulation, analysis.

Study funding: No targeted funding reported.

Disclosure: The authors report no disclosures relevant to the manuscript. Go to Neurology.org for full disclosures.

MRI shows diffuse cerebellar cortical hyperintensity on T2 (A) and fluid-attenuated inversion recovery images (B); the involved areas show restriction (C) and enhance after contrast administration (D).

New! AAN Transforming Leaders Program

Are you an established AAN member neurologist 10+ years out of residency who wants to move your career to the next level? Do you want to become a future leader at the AAN and in the field of neurology? Apply for the new, elite AAN Transforming Leaders Program by visiting AAN.com/view/TransformingLeaders. Application deadline is July 1, 2016.

Save These Dates for AAN CME Opportunities!

Mark these dates on your calendar for exciting continuing education conferences by the American Academy of Neurology. Learn more at AAN.com/conferences.

Sports Concussion Conference
  - July 8–10, 2016, Chicago, IL, at the Hilton Chicago

Fall Conference
  - October 14–16, 2016, Las Vegas, NV, at the Cosmopolitan of Las Vegas
Cerebellitis as an atypical manifestation of scrub typhus
