

Table : Total In-study Relapses (ISR) (protocol and non-protocol defined)

	Placebo	Natalizumab 1mg/kg	Natalizumab 3mg/kg	Natalizumab 1mg/kg v placebo	Natalizumab 3mg/kg v placebo	Natalizumab (1&3mg/kg) v placebo
Total ISRs*	5	13	7	P=0.023	P=0.49	P=0.090

*In-study relapses as defined by the evaluating (protocol defined relapses) and treating neurologist (non protocol defined relapses). These figures are obtained by summing the 2 sets of figures given in the text on pages 2040-2041.

Chi-squared, using Excel.
